### Ferry Grove State High School

With a student population reaching 1,800, the school is large enough to offer significant diversity and something for everyone, while ensuring that every student is valued as an individual who is encouraged and supported to 'Always Aim High'. The school is recognised for its strong traditional values, which are embedded in a caring and supportive environment.

### Three-story learning facility \$12M Ferry Grove, Queensland, Australia Services delivered: construction

#### Business value created for the client

This new state-of-the-art facility provides a superb learning and interactive environment for the students and staff.

#### The challenging scope Wiley delivered

- 22 General Learning Areas (GLA)
- 1 STEM studio
- 5 collaborative spaces
- 3 science laboratories
- 3 Flexible Learning Areas
- 12 stores (chemical, science, resource etc)
- Staff room, kitchenette, data room and amenities

As with every educational project we deliver, Wiley closely collaborated with stakeholders throughout construction to ensure:

- We provided a safe environment for students, staff and construction workers
- Our activities did not adversely impact staff, parents or students
- The school's daily operations were maintained

The Wiley team assessed the project and identified several major challenges in the construction of a building this size, in the main entry to the school, and in close proximity to a main arterial road.

To mitigate risks during construction, Wiley:

- Maintained a secure, safe environment for employees, students and site visitors; including efficient and effective management of pedestrian and vehicular traffic
- Managed contractor parking control
- Scheduled deliveries outside of school drop off/pick up times where possible
- Implemented a holiday works program, avoiding major works during the school terms
- Developed and implemented Stakeholder Management and Communication Plans to ensure a high-level of communication between all parties.
